

Employment Opportunity

Company: Cement Council of Texas
Location: Dallas/Fort Worth area, Hurst, Texas
Position: Highway Pavements Engineer
Education: BS Civil Engineering
Experience: 5-10 yrs in civil engineering applications with emphasis on pavement design
Travel: In-state travel required
Salary: Annual salary range is \$85,000 to \$100,000. Salary is based on experience.

Full-time Position Description

The CCT is seeking a highly motivated professional to manage and further develop a market for the construction of highway, airport and port facility pavements with portland cement in Texas. The position is a salaried position with an attractive salary and benefits package. The individual is responsible for developing concrete pavement projects with key decision makers in the TxDOT, FHWA, FAA, and related agencies involved in transportation.

The Cement Council of Texas is a non-profit trade association that promotes the use of cement and concrete in the construction of highways, airports, municipal streets, parking lots and other surfaces that can be constructed with portland cement concrete.

Requirements

Qualifications for this position are:

- A BS in Civil Engineering with 5-10 years of experience in the public and/or private sector transportation areas with a focus on pavements. A professional registration in Texas is required or registration can be obtained within 2 years of employment.
- An understanding and working knowledge of the engineering requirements of the position at the outset. This is not an on-the-job- training position.
- Individual must be self-starter, creative, persistent, and enthusiastic and possess a strong work ethic.
- Must have good writing and oral presentation skills and a knowledge of power point presentation development.
- Individual must have the ability to develop relationships and network throughout the design and contractor communities.
- In-state travel will be required to establish and sustain essential contact with public officials, owners and consulting engineers.
